

XERIC GARDENS

GARDEN IN A BOX™: GARDEN KITS HELP COMMUNITIES IN COLORADO MEET CONSERVATION GOALS

What is Garden In A Box™?

- Water conservation via landscape change
- An easy and affordable way for community members to save water and beautify their landscapes with professionally designed Xeric (low-water) perennial gardens
- Do it yourself garden kits that come with 15 to 30 started plants, a comprehensive planting and care guide and 1 to 3 plant by number maps

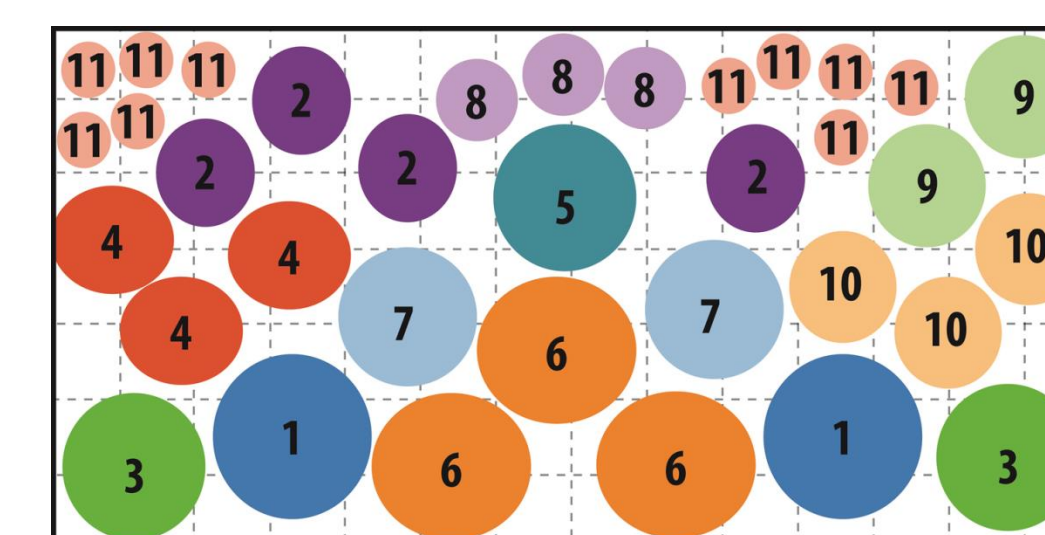

Benefits of Garden In A Box™

- An unconventional motivation for water conservation: to make a yard more beautiful
- Pairs perfectly with turf replacement programs
- Participants LOVE the program. Average satisfaction: 4.4/5

“With this program, we know our plants will do incredibly well [in Colorado’s tough climate]. It’s the best deal out there allowing us to save water, to save money, and to beautify our yard!” – Happy customer

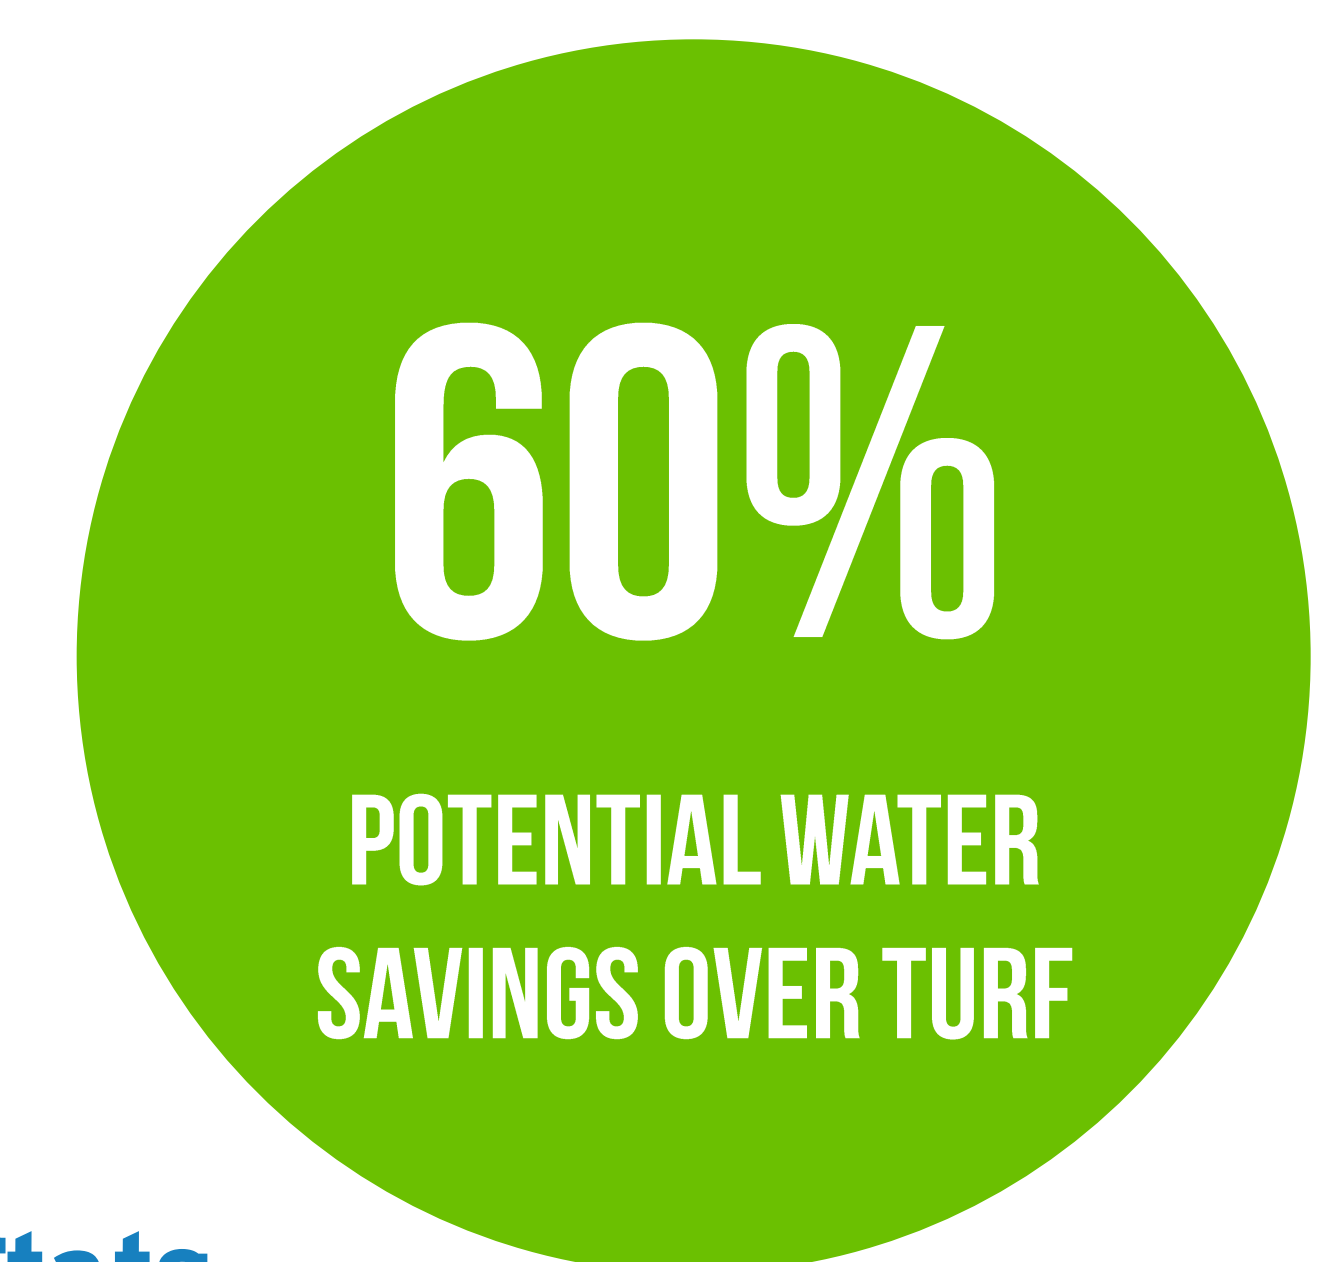

Who is the Center for ReSource Conservation?

The Center for ReSource Conservation (CRC) is a Boulder-based social enterprise nonprofit that puts conservation into action. CRC specializes in water conservation programs, including Garden In A Box™.
