Aqua Cents ® Water Management	Booth 122	Save 50% on outdoor water use with Aqua Cents Water Management. Using patented technology to deliver water-absorbing hydrogel beneath the root zone of existing turf, customers are reducing water use up by 50%. Save on the amount and frequency of water & fertilizer required with our organic hydrogel water-absorbing and holding capabilities. Savings are realized for a sustained period of 5-7 years with attractive ROIs.

### Jon Montgomery video on Metropolitan Water District Biochar and Compost Field experiment at UCR Turf Field Day

Author: Milton E McGiffen

Published on: October 7, 2015

The annual UCR Turf Field Day had its usual turnout of several hundred from across California and beyond. Jon Montgomery's thesis includes a large field experiment funded by the Metropolitan Water District's Innovative Conservation Program. Enjoy Jon's enthusiastic description of the project and his results, but please ignore me:

# Innovative Conservation Program Info

The screenshot shows the homepage of bewaterwise.com. At the top left is the seal of The Metropolitan Water District of Southern California. To its right is the text "THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA". Below the seal is the website's logo, "bewaterwise.com®". A horizontal menu bar below the logo includes links for "Home", "Garden Spot", "Rebates", "Events", "Contacts", "Drought", "Classes", and "Español".

The main banner features a blue gradient background with water droplets and a yellow warning sign with an exclamation mark. The text "Find out how the drought is affecting Southern California and beyond" is displayed above the word "DROUGHT 2015". A "Read more ▶" link is located at the bottom right of the banner.

Below the banner, there are two main sections:

- Left Column:** Features a red, multi-hole water valve handle. Below it is the text "Take your turn." and "Every drop we save counts.". Two blue buttons at the bottom are labeled "GET WATER SAVING TIPS" and "CAMPAIGN ADS AND MATERIALS".
- Right Column:** Features a photograph of a yellow flower. The text "Rebates, Incentives & Grant Programs" is displayed. Below it are several program descriptions:
  - SoCalWater\$mart Rebates**: Save for homes, businesses, gardens and landscapes
  - On-Site Retrofit Pilot Program**: Incentives for public or private property owners to convert potable irrigation or industrial systems to recycled water
  - Water Savings Incentive Program**: Incentives for custom water use efficiency projects
  - Landscape Irrigation Survey**: No-cost survey to help improve irrigation efficiency
  - Innovative Conservation Program**: Research-focused program of new devices, technologies and water-saving strategies (this section is circled with a red arrow)
  - World Water Forum**: Offering grants to college teams to research and develop cost-effective, water-saving technologies, policies or communication strategies

**What is the Innovative Conservation Program?**

Metropolitan's Innovative Conservation Program (ICP) provides funding in cooperation with the U.S. Bureau of Reclamation (USBR), Southern Nevada Water Authority (SNWA) and the Central Arizona Project (CAP) for research that will evaluate the water savings potential and reliability of innovative water savings devices, technologies and strategies.

New projects are identified and evaluated every other year. The next round of funding is scheduled for 2015. All interested parties including public, private or nonprofit organizations are eligible for funding.

**ICP Projects**

View a list of the 2013 Awarded Projects

**Contact ICP**

To receive notice when the 2015 ICP is available or for additional information, contact:

**Marcia Ferreira**  
Water Resources Management Group  
Metropolitan Water District of Southern California

**Examples of Past Project Reports**

**Valvette Systems LittleValve Water Savings**  
 This project was designed and undertaken to quantify the water savings of LittleValve sprinkler products compared to existing irrigation products on the market.

**Univ. of Calif. Riverside Leaching Requirements for Turf Grass Salinity Management and Water Conservation**  
 This project investigated the effects of hyper saline water on rye grass across various irrigation profiles.  
December 2011 final report  
March 2012 update

**Central Basin Municipal Water District Water Savings in Disadvantaged Communities**  
 This study evaluates water needs, savings and the rebate process, and sought to reduce imported water demands, reduce stress on the Bay Delta, improve water supply reliability and meet conservation objectives.

**Global Energy Partners, LLC Condensing Boiler Economizers**  
 The objective of this report is to evaluate benefits associated with condensing boiler economizers.

**Conserv Co Faucet Washer Retrofit Program**  
 Pilot program to evaluate the effectiveness of the DripStop® Valve to save water and energy.

**Orange County CoastKeeper Orange County Stormwater Infiltration Retrofit Pilot Program**  
 This pilot program assessed the efficiency and cost-effectiveness of a large-scale Low Impact Development (LID) incentive program.

**Fytogreen Pacific, Inc., and Cal Poly Pomona Water Conservation Using Fytogreen**  
 The experiment was designed to test the effectiveness of a soil amendment for water efficiency and increase turf grass quality.
